RESEARCH INTERESTS

Observational Cosmology Photometric Calibration	Milky Way (Sub)structure Large Scale Surveys	Dark Matter Instrumentation	Tidal Streams Science Validation
--	---	--------------------------------	-------------------------------------

APPOINTMENTS

Sep. 2024-Present	DiRAC Postdoctoral Fellow, DiRAC institute	U. of Washington Seattle
2021-2024	Postdoctoral Research Associate Rubin Observatory commissioning/Observational cosmology	U. of Wisconsin Madison
2020-2021	Universities Research Association (URA) Visiting Scholar	Fermilab
2016-2021	Graduate Research Assistant: Astronomy & Instrumentation	Texas A&M

EDUCATION

Ph.D. in Astrophysics Texas A&M University Science: Jennifer Marshall & Louis Strigari	Instrumentation: Darren DePoy	2021
B.S. in Astrophysics Haverford College		2013

SCIENTIFIC COLLABORATIONS

2021-Present *Vera Rubin Observatory*: I am an in-kind contributor making significant contributions to many areas of the commissioning process. A few highlights:

- System Integration, Test, and Commissioning (SITCOM): I am one of the core members of the data analysis team helping provide rapid analysis of commissioning efforts (recently the telescope mount and main mirror cells). Additionally, I am helping to develop the tools we will use for the rest of commissioning. I have spent the last 6 months in Chile working closely with the construction team and acting as a volunteer observing specialist.
- Science Verification and Validation (SVV): I have led ad-hoc analyses of Aux-Tel data, been a developer for `analysis_tools` the metric framework for the Rubin Science Pipeline, helped to develop the science validation surveys for commissioning, and am the science lead for the commissioning science unit focused on object detection, quality flags, verification & validation sample production, and survey property maps.
- Data Management (DM): I am one of the core members creating `the_monster` an all sky reference catalog to bootstrap photometric calibrations for early operations. I also can process data and develop code for the rubin science pipelines.

- 2021-Present *Dark Energy Science Collaboration (LSST-DESC)* [<https://lsstdesc.org/>]
Member: Acting as a bridge between the Vera Rubin Observatory project and DESC to assist the Photometric Corrections, Science Release and Validation, and Commissioning working groups.
Dark Matter Working Group Convener: I am one of two conveners for this working group within DESC
- 2018-present *DECam Local Volume Exploration (DELVE) Survey* [<https://delve-survey.github.io>]
Builder: DELVE is a 3-year survey combining archival DECam data with 126 nights of dedicated observing. This survey looks to probe the small scale nature of dark matter by (1) searching for ultra faint MW satellites and stellar streams, (2) studying the satellite population and star formation history around the Large and Small Magellanic Clouds, and (3) deeply imaging around isolated Large Magellanic Cloud analogs to determine their satellite luminosity function. I have contributed to much of the calibration pipeline, data validation, and morphological classifier for our first data release DELVE-DR1 in early 2021.
- 2016-present *Dark Energy Survey (DES)* [<https://www.darkenergysurvey.org>]
- 2020-present *Southern Stellar Stream Spectroscopic Survey (S^5)* [<https://s5collab.github.io/>]

- 2023 "*Plenary talk on dark matter working group*", Remote, DESC spring meeting Talk
- 2023 "*Seeking the nature of dark matter with the Milky Way halo*",
UW Madison Astronomy Colloquium Talk
- 2022 "*Calibration of the DELVE survey*", DESC Photometric Corrections Working Group Talk

Contributed.....

- 2026 "*S5 view of the Jet stream*", S5 Collaboration meeting Talk
- 2025 "*Searching for semi-resolved dwarfs in the era of LSST with Synthetic Source Injection (SSI)*",
Galactic Frontiers II Poster
- 2023 "*Dark Matter with Rubin Observatory*", PCW Session organizer
- 2022 "*Calibration of the DELVE survey*", DESC Collaboration Meeting Talk
- 2021 "*The Jet stream in DELVE*"
Streams21: Constraints on Dark Matter, Virtual Talk
- 2020 "*Further development and testing of TCal: a mobile spectrophotometric calibration unit for astronomical imaging systems*", SPIE Astronomical Telescopes + Instrumentation, Virtual Poster
- 2019 "*Exploring the 3D structure of the Sagittarius dSph core using RR Lyrae*"
RRL/Cepheid, Cloudcroft, NM Talk

2018 “*TCal: a mobile spectrophotometric calibration unit for astronomical imaging systems*”
SPIE Astronomical Telescopes + Instrumentation, Austin, Tx.

Poster

PROPOSALS

Below are the successful observing proposals I have been the PI for.

2022 *Probing the Milky Way using DECam and stellar streams*
DECam 2023A (2.5 nights of observations)

2022 *Probing the Milky Way using DECam and stellar streams*
DECam 2022B (3.5 nights of observations)

2019 *Probing the Dynamical Structure of Sagittarius*
VLT/FLAMES cycle 105 (0.5 nights of observations pushed to 2021 due to COVID)

2019 *Probing the Dynamical Structure of Sagittarius*
Gemini south 2020A (18 hours of observations not taken due to COVID)

OBSERVING EXPERIENCE

Rubin Observatory Simonyi Survey Telescope Assisting commissioning and integration efforts	15 nights
--	-----------

Cerro Tololo Inter-American Observatory Chile – Blanco 4-meter telescope Used DECam both in person and remotely	14 nights
---	-----------

McDonald Observatory TX, USA – Harlan Smith 2.7-meter telescope Used Tull coude Echelle Spectrograph for R-Process Alliance Observing	20 nights
---	-----------

Gemini South: Chile – 8-meter telescope Commissioned 2 new filters on FLAMINGOS-2	3 nights
---	----------

Gemini North: HI, USA – 8-meter telescope Operated Queue as part of work at Gemini	3 nights
--	----------

AWARDS

2021 Spring TSAPS outstanding talk by a graduate student

2020 Fall TSAPS outstanding talk by a graduate student

2020 URA Visiting Scholar at Fermilab award (Sponsor: Alex Drlica-Wagner)

MENTORING

2026-present Emma Lamb-Smith, an astronomy major at UW Seattle, has worked on using machine learning methods to identify new cluster scale strong lenses in LSST data.

2025-present Matthieu Plessier, a physics PhD student at Université Grenoble, has worked on measuring the impact of the observational selection function on stellar stream density measurements.

2024-present Elliott Burdett, a physics major at UW Seattle, has worked on finding new stellar streams in delve data and developing scalable code for stream searches in LSST.

- 2024-present Shriya Prasanna, a physics major at UW Seattle, has worked on modeling stellar streams and fitting for the orbits of their progenitors.
- 2022-2025 Kyle Boone, a physics major at UW Madison, has worked on using synthetic source injection (Balrog) and survey property maps to generate stellar weight maps for DES analyses that resulted in a publication. Kyle is now a grad student at Harvard.
- 2023-2024 Miranda Gorsuch, a physics PhD student at UW Madison, has worked on data analysis for LSST commissioning.
- 2020-2021 Kiyan Tavanagar, an astrophysics major at University of Chicago, has worked on characterizing stellar streams found in DES. Kiyan is currently a graduate student at Columbia.
- 2018-2021 Leo Barba, a physics major at Texas A&M, has worked 3D printing and designing parts for TCal as well as helping to set up and run the instrument. Currently astronomy graduate student at UMass Amherst.
- 2018 Sarah Hughes, an REU student at Texas A&M, helped to design the LabView based software used to run TCal.
